In honour of International Women's Day, we present this list of 30 women architects from across the globe whose names (and works) everyone should know.

13 Manuelle Gautrand, **Manuelle Gautrand Architecture**, France

From her Paris-based office of more than 15 architects, Gautrand aims to "re-enchant the city." The firm seeks to create what Gautrand calls "poetic architecture"; her projects include hotels, theatres and showrooms marked by bold use of colour and angular forms.

Why you should know her: Gautrand is currently collaborating with DesignInc and Lacoste + Stevenson on a landmark \$50-million civic and community building in the Australian city of Parramatta.
