METAL CLADDINGS

Metal Cladding on the extension of a residential building in Fukuoka, Japan.

INVESTIGATING THE MATERIALITY OF METAL CLADDING

Metal cladding is a versatile and durable material that offers a wide range of design possibilities. It can be used to create modern, minimalist, or traditional structures, and its aesthetic is constantly evolving. In this section, we will explore various examples of metal cladding in contemporary architecture.

PICTURE DESCRIPTIONS:

1. **Whitecliff House, England, UK, 2009.** Photo by Joerg Stamm: This example showcases the use of metal cladding in a residential setting. The cladding provides a sleek, modern look to the exterior of the house.

2. **Metal Cladding on the extension of a residential building in Fukuoka, Japan:** This project demonstrates how metal cladding can be used to enhance the visual appeal of a building while also offering thermal and weather protection.
