The extension to the Comédie de Bethune (Nord-Pas-de-Calais) completes the building existing of the theater designed by Manuelle Gautrand and opened in 1999. The new building is linked to the main building by a new structure built between the old building and the new extension. This new structure is a shell of metal and glass supported by a lattice of steel beams. The new building is located at the corner of a three-story lot, forming a three-story building.
