Manuelle Gautrand: the luxury of being unaccustomed

Manuelle Gautrand's, a French architect, project in Iran was completed in 2017. The project is a residential building in the heart of Tehran, designed to offer a unique experience to its residents.

The building is located in a prime location near the University of Tehran, and is designed to be a symbol of modernity and innovation.

The project is a great example of how architecture can influence the way we live, work and play. It is a testament to the fact that good design can make a positive impact on society.
